SOLUTIONS

Transform any flat panel TV into a Wireless Digital Signage Display.

The most cost effective digital signage solution!

Digital Signage MicroPlayer

- WiFi for indoor deployment
- Designed for Digital Signage
- Very low cost of ownership
- Easy setup, ready to go.
- No installation required
- Play all type of picture and video formats

Web based Content Management

Airgoo's HDMI MicroPlayer coupled with our easy to use web based CMS and android integrated APK make a unique combination of simplicity and versatility.

Just plug the MicroPlayer at the back of any TV set equipped with an HDMI socket and within reach of a WiFi network and you are ready to upload content and launch advertising campaigns
